

# WE ARE LOOKING FOR A SATELLITE ENGINEER

[Join our team](#)

## WHO WE ARE

We are transforming the capabilities of the Caribbean's public safety community. <http://bit.ly/aboutneptune>

## WE ARE LOOKING FOR

An experienced **Satellite Engineer** to support our network rollout program.

## WHO YOU ARE

- Experienced, because you've worked in the satellite industry before.
- A self-starter who doesn't need permanent supervision.
- A team player who helps bring out the best in your teammates.
- An excellent communicator, skilled at interworking regularly with commercial and technical teams, international partners and customers.
- Detailed, methodical, efficient and polite.
- Driven towards achieving excellent outcomes.

## WHAT YOU WILL DO

- Support network architecture strategy, implement satellite network management routines, oversee installations, service activation and provide post-sales support.
- Train junior engineers.

## WHAT WE NEED YOU TO HAVE

- 5 years + experience in the satellite industry in a similar role.
- Undergraduate engineering degree (preferably Computer Science or Electrical Engineering).
- Telecommunications) or equivalent.
- Knowledge of BSS/OSS systems.
- Knowledge of connectivity services via satellite and TCP/IP and telecommunication networks, CCENT.
- Fluency in English.

## WOULD BE AN ASSET

- A post-graduate degree, MEng / MSc Engineering (preferably Electronics & Telecommunications) or equivalent.
- Fluency in French or Spanish.
