# WE ARE LOOKING FOR AN ENGINEER

## WHO WE ARE

We are transforming the capabilities of the Caribbean's public safety community. <http://bit.ly/aboutneptune>

## WE ARE LOOKING FOR

An **Engineer** to support our network roll out program.

## WHO YOU ARE

- A self-starter who doesn't need permanent supervision.
- A team player who helps bring out the best in your teammates.
- An excellent communicator, skilled at interworking regularly with commercial and technical teams, international partners and customers.
- Detailed, methodical, efficient and polite.
- Driven towards achieving excellent outcomes.

## WHAT YOU WILL DO

- Support the engineering, planning, costing, maintaining, commissioning, documenting and testing of networks across the region.
- Work with cross-functional teams to communicate the engineering design plan, the development and deployment of network plans, upgrades and enhancements.
- Maintain good customer relationships ensuring solutions meet customer requirements and provide ongoing support.
- Engage extensively with colleagues, customers and partners to drive successful projects.
- Setup and tune network systems.
- Research, evaluate and analyse relevant industry trends.
- Prepare and maintain network systems documentation.
- Assist with the preparation of business cases, bid specifications and requests for proposals.

## WHAT WE NEED YOU TO HAVE

- Undergraduate engineering degree (preferably Computer Science or Electrical Engineering).
- Strong analytical and problem-solving acumen to assist with preemptive troubleshooting of customer and network-based issues.
- Strong project management expertise combined with excellent interpersonal and communications skills (verbal and written).
- A strong understanding of all Microsoft Office applications.
- Knowledge of connectivity services via satellite and TCP/IP and telecommunication networks, CCENT.
- You must have a valid driver's license, maintain a safe driving record and be medically fit to drive.
- We need you to be comfortable with travelling regionally.

## WOULD BE AN ASSET

- Mobile and VAS Telco background with RF knowledge.
- Experience in the telecommunications field.
- Project management experience.
- Ability to create system architecture diagrams.
- IP routing knowledge (CCNA, CCNP, CCDA).
- Fluency in French or Spanish.

If this is you, send your resume with
